

JOHNNY ASTROTM

LANDING BASE SET

INSTRUCTION SHEET

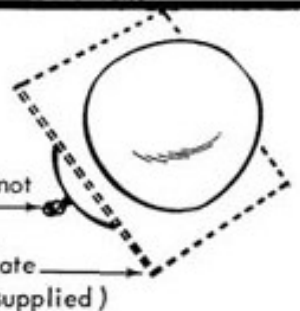

PLEASE READ THESE INSTRUCTIONS CAREFULLY!

© DE LUXE TOPPER CORPORATION, 1987 ELIZABETH, NEW JERSEY

Step 1 To Inflate Space Vehicle:

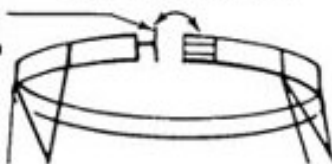

Blow up balloon until it just passes through the template (approximately 8" in dia.) and tie knot.

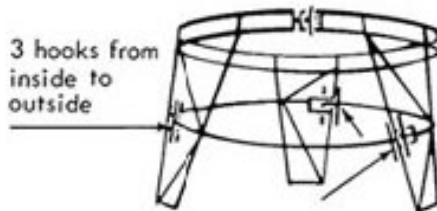

Step 2 To Assemble Undercarriage:

Insert hook into slot

Outside to inside with this hook.

3 hooks from inside to outside

Step 3 To Attach Undercarriage:

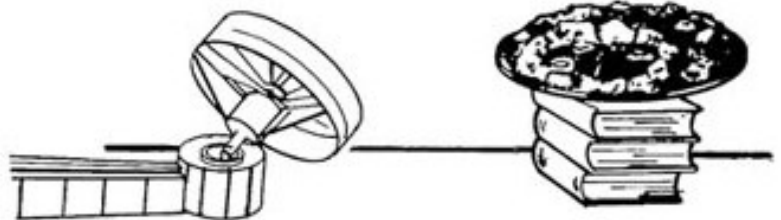

Scotch tape undercarriage to balloon at three points shown.

Be Sure to center around bottom of balloon.

Step 4 Landing Space Craft.

Your space vehicle may land on the launching station or any surface (table, books, cartons, a friend's head, etc.) that is at least 12 inches higher than the control base table.
